## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a router, motor base, plate and first adjustment means combination, classified in class 144, subclass 135.1.
- II. Claims 10-18 and 30-36 drawn to a router, motor, and adjustment mechanism having a first and second shaft subcombination, classified in class 144, subclass 135.2.
- III. Claims 19-29, drawn to router, motor, adjustment mechanism and support member combination, classified in class 144, subclass 134.1.
- IV. Claims 37-47, drawn to router, motor and hand grip combination, classified in class 144, subclass 154.5.
- V. Claims 48-55, drawn to router, motor, base plate combination, classified in class, 206 subclass 349.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination(s) as claimed does not require the particulars of the

Application/Control Number: 10/718,048

Art Unit: 3725

subcombination(s) as claimed as evidenced by claim 19. The subcombination has separate utility such as use with any router and support and is not limited to the invention of Group III.

Inventions of Groups I, III, IV and V are related as separable and distinct combinations relating to separate distinguishing structure. The inventions of Groups I, III, IV or V do not rely on the particulars of any one of the other Groups for its operation. Accordingly the inventions are separable and distinct and the restriction is deemed proper.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and divergent subject matter; and because the searches required for Groups I-V are not the same, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shelley Self whose telephone number is 703-305-5299. The examiner can normally be reached on 8:30 - 5:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allen Ostrager can be reached on 703-308-3136.
